

## INTERNATIONAL INFORMATION TECHNOLOGY

Are you fascinated by the inner workings of technology? Do you have the logic mind required to diagnose, repair and upgrade computers? Perhaps you're ready to qualify as an IT Technician. This programme will help you equip yourself with the required skills and knowledge. Obtain the relevant skills to troubleshoot, repair and upgrade computers, as well as installing and fine-tuning the operating system.

We are exposed to networks most of the day. On every just about every office desk is a networked computer. In your pocket – your mobile phone connects three or more different network protocols at any given time. This worldwide technology is a daily necessity for business and leisure and it needs a higher level of expertise to set it up, monitor it and maintain it.

### Get the skills and get certified

The CompTIA international and the ICDL International exam demands accuracy and excellent knowledge. Therefore it's wise to invest in quality training so that your chances of success improve dramatically. Qualitas works with lecturers who are qualified and experienced in this field. On completion you will be able to take an international exam at a CompTIA & ICDL approved testing centre.
